- very friendly and approachable instructor. awesome and very organized. homework is too hard and time-consuming for a one-credit class

- The course was well structured, packing a lot of information into a short timeframe, but never overwhelming the students. I walked away knowing a lot of material and, more importantly, knowing where I can get assistance to further my learning.
  Kangkook was a fantastic, generous professor as well. I would not have learned 25% of what I did if not for his passion for the subject and his willingness to invest time in his students. His lectures were clear, if fast paced, and he always made himself accessible after class to answer questions and encourage us to go beyond what was covered. His office hours were always packed, and he was always

patient, making sure he answered every student's questions, even if it took a good portion of the day.

- KangKook was the best instructor I've ever had! I found his lecture very organized and easy to understand despite my unfamiliarity with programming. He was very nice, and willing to help students.

- Overall, I liked Kangkook very much as a instructor. He is very nice and approachable and responsive to students. I think the first 4 lectures for this course were clear and easy to follow. The last 2 lectures, however, which were focused on specialized modules, became dense and difficult to follow. I also think it would have been helpful to have a specific reference book to refer to. I found myself looking things up rather randomly on the internet when I didn't understand a functionality and it would have been better to have a reference text to refer to.
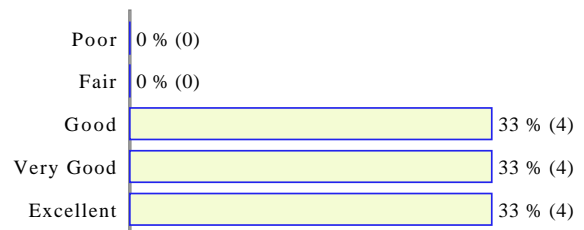

Instructor/Evaluatee: Kangkook Jee

### 6. Instructor: Organization and Preparation

12 answers, mean = 4.42

Poor	0 % (0)
Fair	0 % (0)
Good	0 % (0)
Very Good	58 % (7)
Excellent	42 % (5)
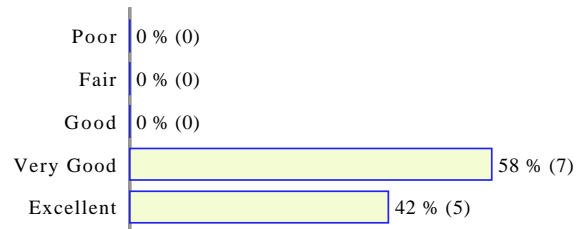

7. Instructor: Classroom Delivery

12 answers, mean = 4.00
